Subject: Overdue response

Dear Mr. Schaper: On August 15, 2013, USEPA sent you a letter requiring revisions to your wetland restoration plan. The revisions were due on September 10, 2013, and it is now September 17, 2013, and we have not received your response. You have a history of either not responding or responding late and incompletely in this matter relating to voluntary wetland restoration, replying to Requests for Information and to our March 13, 2013, Administrative Compliance Order. I remind you that USEPA may escalate this matter to include civil penalties, injunctive relief or both. Our penalty policy allows us to increase the penalty amount based on 'recalcitrance' or the Respondent's cumulative lack of effort and cooperation in this matter. This email is not an extension of time for you to respond, but rather a warning to you and to record/document your 'recalcitrance' in complying with our Administrative Compliance Order.
